**Supporting your health and safety at work:
UBC's Occupational & Preventive Health
program**

Amelia Douglas
**Program Coordinator for UBC's Occupational &
Preventive Health (OPH) Program**
University of British Columbia

Thursday October 28th, 11:30 – 12:30 PM

ZOOM Virtual Seminar

(ZOOM Meeting ID: 647 8765 0329; passcode: 418237)

“Through personalized immunization reviews and provision, risk assessments, and occupational exposure consultations with the OPH Nurse and Physician, UBC's OPH program aims to protect the health and safety of employees through preventive health measures. During this session, Amelia will give an overview of OPH, including the free services that are available to you as an employee, and will discuss your questions related to workplace health.”

Biosketch:

Amelia joined UBC's Workplace Health Services team in 2017 after completing her master's degree in Public Health at SFU. Since that time, she has worked on expanding the Occupational & Preventive Health program through medical surveillance activities that focus on prevention and health promotion, to support UBC employees across both Vancouver and Okanagan campuses. Amelia has a keen interest in learning more about emerging occupational health topics and enjoys the diversity of occupational exposures present at UBC, from pathogen research in laboratories to plumbing work on campus.
