

You are Invited to Participate!

Learn about, engage in, and inform the design, discussion, and implementation of health research into practice!

A research team from the UBC Centre for Heart Lung Innovation (HLI) is undertaking a research study to evaluate a Knowledge Translation & Mobilization (KTM) training program. The training is designed to support graduate and post-graduate students with getting the right research to the right people in the right format, at the right time, to influence decision-making.

After completing the KTM training, students will deliver research presentations at a Patient and Public Forum. You are invited to attend the Patient and Public Forum virtually or in-person to learn about and engage with the students' research and provide feedback for the KTM training program.

Patient and Public Forum Gourlay Conference Room or Zoom (virtual) Thursday May 19, 2022 12:00pm

Potential benefits to participating patients include:

- Have increased **engagement** in KTM activities.
- Have increased **empowerment** in research projects that have direct and indirect impacts on their lives.

Potential benefits to participating members of the public include:

- Have increased **engagement** in KTM activities.

Participation in this study is voluntary and will require approximately 1 hour of your time. A select number of patients and the public will be invited to participate in a focus group (45-60 minutes). As compensation for your time, \$25 will be provided for participating in the focus group.

To sign up for the Forum, please use the QR code or contact:
