Centre for Heart Lung Innovation Seminar Series

Translational Cardiovascular Research: Focus on Valvular Heart Disease Innovation from Bedside to Bench

Stephanie Sellers MSc, PhD
Janar Sathananthan BHB, MBChB, MPH, FRACP
University of British Columbia
St. Paul's Hospital

Friday March 19th, 11:30 – 12:30 PM
ZOOM Virtual Seminar
(Meeting ID: 662 2255 0438; Passcode: 623137)

Hosted by HLI

“Structural and valvular heart disease are a key clinical challenge that requires innovative from both the bench and clinic with integrated knowledge translation. Here we discuss our vision for a collaborative translational laboratory with a primary focus on bioprosthetic heart valves. We highlight our on-going projects and recent publications exploring the importance of bench testing of cardiac devices, the investigation of the molecular mechanisms driving valve degeneration, and the use of tissue validation in developing new translational and clinical imaging techniques.”

This event is a Self-Approved Group Learning Activity as defined by the Maintenance Certification Program of the Royal College of Physicians and Surgeons of Canada
