Centre for Heart Lung Innovation Seminar Series

Understanding & mitigating the inflammatory consequences of one-lung ventilation during lung surgery

Biniam Kidane, MD, MSc, FRCSC

Associate Professor of Surgery, College of Medicine, University of Manitoba
Medical Director, Wilf Taillieu Thoracic Clinic & Endoscopy Unit
Research Director, Surgical Peri-Operative Research Team (SPORT)
Adjunct Scientist, CancerCare Manitoba Research Institute
Adjunct Professor, Department of Physiology & Pathophysiology

Friday, May 20th; 11:30 – 12:30 p.m.

ZOOM Virtual Seminar

(Meeting ID: 662 2255 0438; Passcode: 623137)

Hosted by Dr Chun Seow

“Most surgeries require artificial ventilation which can be harmful to lungs. This harm is higher in lung surgeries. Our research shows that lung surgery increases inflammation on both the operated and the non-operated (i.e. ventilated) lung. Our research explores how this leads to worse complications in patients and how to potentially prevent it.”

This event is a Self-Approved Group Learning Activity as defined by the Maintenance Certification Program of the Royal College of Physicians and Surgeons of Canada
