Centre for Heart Lung Innovation Seminar Series

Cis-regulatory architecture of coronary artery disease risk

Clint Miller, PhD

Assistant Professor of Public Health Sciences,
Biochemistry Molecular Genetics and Biomedical
Engineering
Center for Public Health Genomics
University of Virginia

Friday, May 6th; 11:30 – 12:30 p.m.

ZOOM Virtual Seminar

(Meeting ID: 662 2255 0438; Passcode: 623137)

Hosted by Dr Ying Wang

“Coronary artery disease involves a complex process known as atherosclerosis, the chronic buildup of cholesterol deposits in the inner layer of the coronary vessel wall. Genetic studies have pinpointed hundreds of candidate variants and genes that contribute to disease risk, providing opportunities to identify causal mechanisms, new treatments or biomarkers.”

This event is a Self-Approved Group Learning Activity as defined by the Maintenance Certification Program of the Royal College of Physicians and Surgeons of Canada
