623137)**

Hosted by Gordon Francis

“Lipid nanoparticles represent the most clinically advanced non-viral gene therapy technology and were critical to the success of the COVID-19 RNA Vaccines. This talk will focus on the development of the technology that led to the first-ever approved RNAi therapeutic, Onpattro and highlight current and future applications of LNP technology.”

This event is a Self-Approved Group Learning Activity as defined by the Maintenance Certification Program of the Royal College of Physicians and Surgeons of Canada
