Is COPD a risk factor for poor outcome among Covid-19 positive patients?: A systematic review

Firoozeh V. Gerayeli
Graduate Student

Dr. Don Sin & PAC

Monday, Nov 23rd 2019
9:00 – 10:00 a.m.

Gourlay Conference RM 103
1st Floor McDonald Building

Zoom Video Conference

(Meeting ID: 68563098552; Passcode: 816229)

"The severe acute respiratory syndrome coronavirus 2 (SARS-Cov-2) is a novel virus that was first identified in December of 2019 through a cluster of pneumonia with unknown origin. The studies of evaluating the impact of comorbidities on the prognosis of patients with Covid-19 have shown that COPD is a risk factor for poor health outcomes. The goal of this systematic review was to determine the role of COPD in the outcomes of patients with COVID-19 and to determine sources of variation of findings across the studies."

*This event is a Self-Approved Group Learning Activity as defined by the Maintenance Certification
Program of the Royal College of Physicians and Surgeons of Canada*
